Files in this directory are:

```
README                  this file
desctohtml              script that turns the description file
                        into an html file using the template.
                        When you install or use this, make sure
                        that you add the execute bits onto the script.
                                chmod +x desctohtml
example.desc            The description file.
example.html            The output html
sample.gif              The gif that the page shows.
template.m4             The template.
